Emrel 1

DESCRIPTION

Emrel 1 is an economical aqueous emulsion release agent in a mobile easily handled form.

EMULSION CHARACTERISTICS

Emulsifier	Nonionic
------------	----------

sg (20°C)	1.0
-----------	-----

Viscosity (cPs 20°C)	200
----------------------	-----

WAX CHARACTERISTICS

Wax Type	Oxidised Polyethylene
----------	-----------------------

Wax Softening Point	102°C
---------------------	-------

USES

Emrel 1 exhibits good durability, lubricity and anti-blocking performance as well as abrasion resistant properties.

Emrel 1's is formulated for release of moulded pulp products.

Other Uses

Floor polish / Maintenance, Textiles and Printing Inks.

Further information and formulation advice on individual applications is available on request.

STORAGE

Store in closed containers. If the containers are left open then evaporation will take place and the emulsion will be damaged. Frost will damage this product. Store at temperatures > 5°C - <35°C Do not store in direct sunlight and do not expose to direct heat.

HYGIENE

This product contains biocides to prevent spoilage during storage. Nevertheless containers should be kept closed. Piping and tanks should be cleaned using disinfectant before and after use. The system should then be rinsed well with water before use. Dirty buckets and tools must not be used.

Information contained in this data sheet is, to the best of our knowledge correct, but no responsibility can be accepted for results obtained.
